

Movements of Canisp in 2011

02 August 2011: First flight from eyrie cliff

Canisp flew 280 metres SE at 11am and then back.

16 August 2011

Canisp ranged to the south and at the furthest point was 2.8 km from the nest before returning.

27 September 2011: First trip outside home range

Canisp ranged 17 km to the NE and then returned.

06 November 2011: North to Eriboll

Canisp flew as far north as Loch Eriboll and was at the south end at 2pm today before returning south.

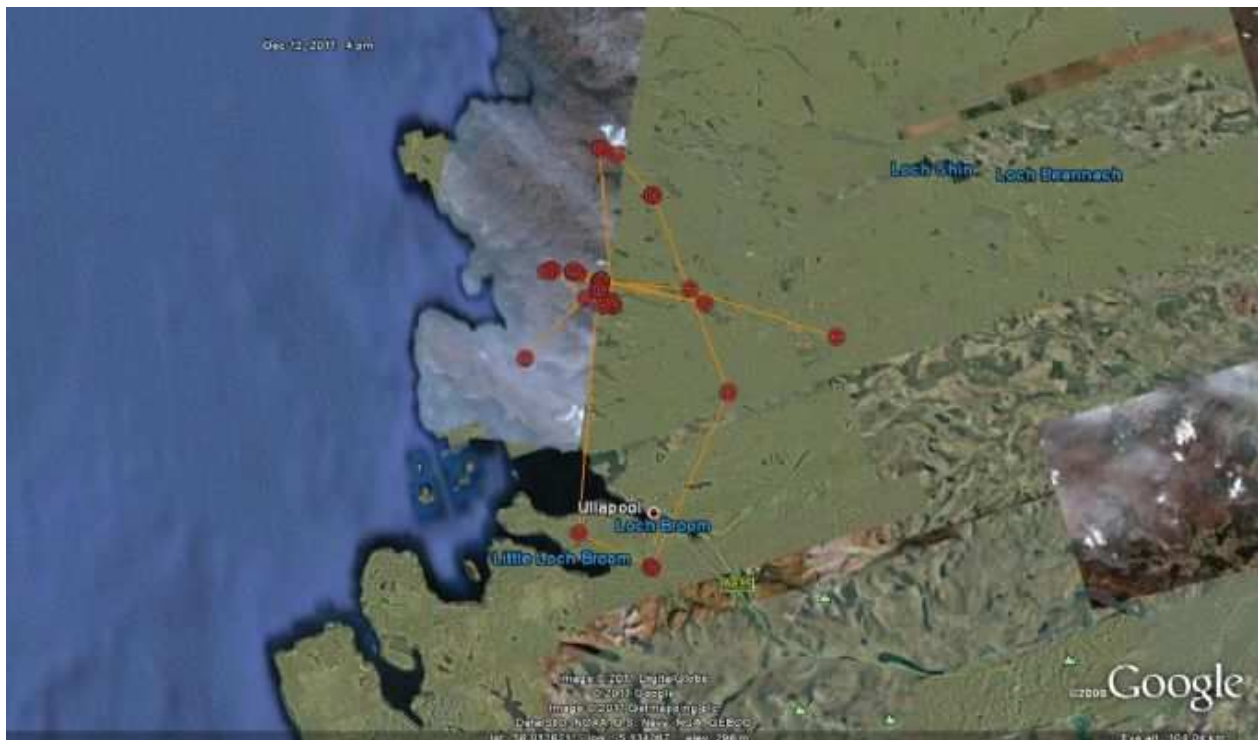

October to early December

14 December 2011

Canisp has been ranging in NW Sutherland but regularly returning to her parents' home-range.

Range August to December 12th - 1600 square km

December 1st-12th

31 December 2011: No change

Remained in same area to end of the month but lack of sunlight meant no GPS locations.
